

FanFold Foam Residing Board

For residing the exterior of your home, you can add up to R-1.5 by using Owens Corning FanFold Residing Board. In addition to adding insulating power, FanFold provides a smooth nailing surface to simplify installation of the new siding. Its long, folded panels eliminate many seams for better resistance to air infiltration, a common drawback with other residing boards.

If you're a "do-it-yourselfer," you'll find installation instructions below. Or you can use the [Dealer/Contractor Locator](#) to find the professional installer nearest you.
